EMEA VENTURES

ART OF TRANSFORMATION

CAPABILITY STATEMENT 2026

Control over complex change.
Confidence in delivery.

Strategy, governance, technology and execution brought together for organisations operating in demanding public and corporate environments.

TWO PRACTICES

Transformation & Performance

Netherlands & Europe Market Entry

OUR PROPOSITION

One standard for complex challenges

EMEA Ventures helps boards and executive teams translate strategic ambition into controlled change, demonstrable performance and sustainable growth.

01 **Strategy to execution**

Choices, resources, risks and delivery connected in one manageable whole.

02 **Control through transition**

Continuity protected while technology, processes and operating models change.

03 **Senior-led delivery**

Direct access, clear accountability and expertise tailored to the challenge.

TWO PRACTICES

Strength from within. Growth from the Netherlands.

PRACTICE 01

Transformation & Performance

For governments, public bodies and large enterprises that need stronger connections between strategy, finance, technology and delivery.

SCOPE

Strategic finance · Performance & control · AI & data governance · Legacy modernisation · Transformation assurance

PRACTICE 02

Netherlands & Europe Market Entry

For international organisations building a controlled Dutch presence and seeking access to local and European markets.

SCOPE

Market intelligence · Entry architecture · Governance & finance setup · European readiness · Local executive coordination

THREE CORE CAPABILITIES

Designed for coherence, not isolated solutions

01 Strategy & Performance

Strategic finance, scenario analysis, spending reviews, KPI & data, sustainable accountability.

02 Technology & Transformation

AI & data governance, legacy modernisation, transition assurance, future operating models, ERP & automation.

03 Governance & Resilience

Three Lines, internal control, NIS2 governance, risk management, programme governance and audit trail.

STRATEGIC AGENDA 2026—2035

The context is changing structurally

01 Fiscal resilience

More value and demonstrable efficiency under sustained resource pressure.

02 AI & data governance

Responsible scaling requires operating-model, governance and control redesign.

03 Digital resilience

Boards must connect cyber, continuity and accountability.

04 Legacy modernisation

Phased migration and cutover controls protect critical services and data.

05 Complex transformation

Coherent direction and delivery matter more as dependencies multiply.

06 European market access

The Netherlands offers a strong base—if landing and scaling are controlled.

SELECTED EXPERIENCE

Evidence from complex environments

CASE 01

Integrated corporate control

One decision-making view across HR, IT, procurement, finance, projects and data.

CASE 02

Compliance under pressure

Demonstrable control and clear escalation around substantial, sensitive funding flows.

CASE 03

Controlled systems transition

Continuity safeguarded while systems, shared services and management information changed.

OUR APPROACH

UNDERSTAND → SET DIRECTION → DESIGN → DELIVER & EMBED

Independent in judgement. Close to delivery. We remain engaged until the organisation can move forward independently.

NETHERLANDS & EUROPE MARKET ENTRY

A controlled landing. A European horizon.

We guide international organisations as they establish, structure and scale from the Netherlands into local and European markets.

01 Market intelligence

02 Entry architecture

03 Governance & finance setup

04 Local executive coordination

05 European readiness
